Garry - thank you for providing information on the Sawmill Cove Industrial Park at Sitka. At this time, our project is in early planning stages. Actual construction is not expected to commence until 2016 and major construction contractors will not be selected until closer to that time. Based on our initial impressions, the park is quite remote from the pipeline corridor and therefore will be limited in how it might support the project. We would invite you, however, to register the services that can be offered on the Contractor and Vendor Registration Form that is included on our webpage (go to www.transcanada.com and click on "Alaska Pipeline Project"). We do consult these forms to identify available services and to pre-qualify service providers for the project. We also invite you to monitor our webpage for updates as the project advances.

Thank you for your interest in our project.

Subject: Alaska Gas Pipeline

Hello,

I manage a waterfront industrial park located in Sitka, Alaska for the City and Borough of Sitka by contract. The Sawmill Cove Industrial Park in Sitka, Alaska is an 80-acre industrial center with a waterfront that could accommodate a deep water dock. The park is located in Southeast Alaska almost half way between Seattle and Anchorage and faces the Pacific Ocean. Please click on a webpage that explains more about the industrial park, www.sawmillcove.com.

The purpose of this email is to inform you about the industrial park with the thought that it might be beneficial to your plans to build a gas pipeline. In my view it would be a good place to store materials as we are close to Haines and Skagway Alaska and Prince Rupert, Canada.

Please contact me if you would like additional information or if we can help with your plans.

Thanks for your time.
